

# DISCOVERY DAY AT HOME

## Urban Plants Field Study

Edward Jenner's talents and interests expanded far beyond the study of Smallpox. His abilities to dissect and investigate, as well as his understanding of plant and animal anatomy was also recognised. Jenner showed a keen interest in nature and enjoyed being outside.

**NOW IT IS YOUR TURN** to conduct your own field study! Using the template provided, conduct a exploration of your garden or another green space, taking note of the plants you find. This task allows you to think like Jenner, but don't worry if you can't identify the plant you're observing straight away!

### What Will You Need?

Empty Field Study Sheet [Attached]  
Pen or Pencil  
Ruler  
Sun Cream/Hat [If Sunny]  
Coat [If Cold]

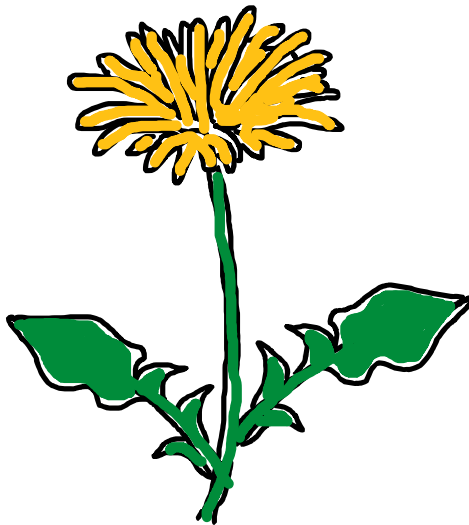

# DISCOVERY DAY AT HOME

Common Name: Dandelion

Botanical Name: Taraxacum
